Distributed solar energy and Blockchain

Decentralized vs centralized production

**1 GW in 22 years**

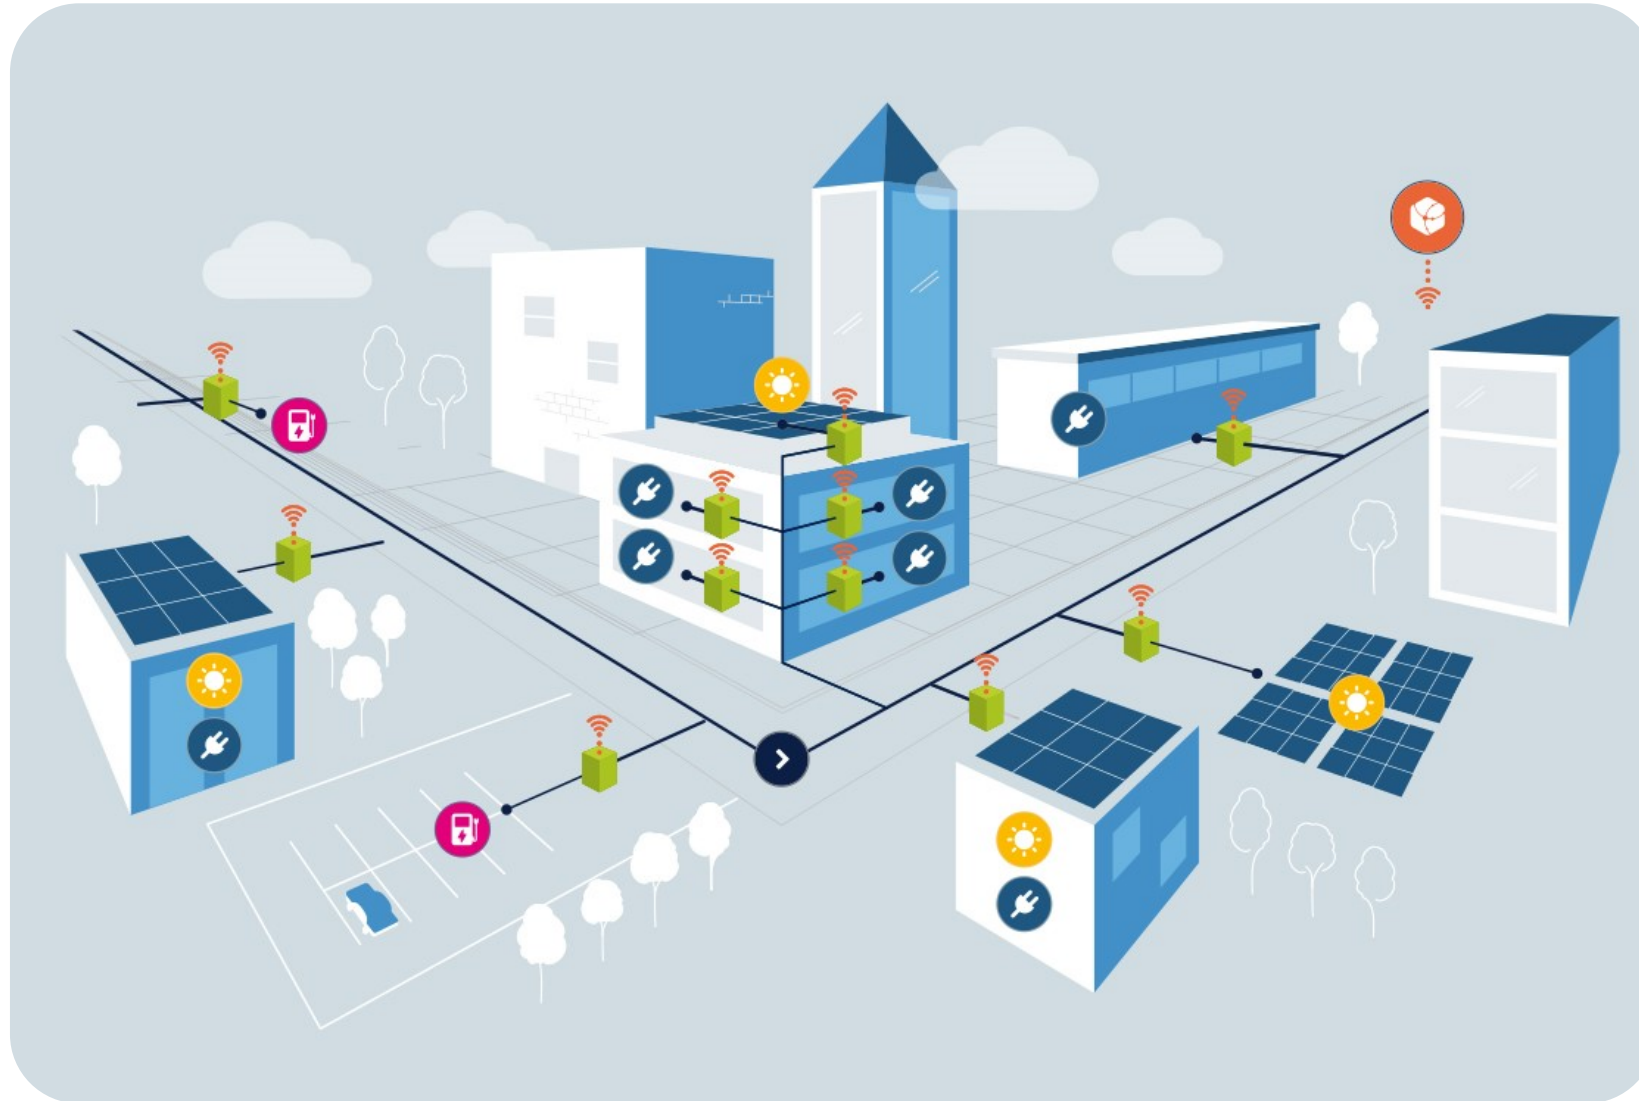

3 GW in 1 month

Energy and IT

Distributed energy

Digital technologies

Energy data management

Energy exchanges on the public grid

A blockchain-based solution

Why the Blockchain ?

- **Distributed IoT network**
- **Security**
- **Certification**
- **First brick**

Blockchain brings innovative:

- **Governance**
- **Trust**
- **Traceability**
- **Scalability**

Collective self-consumption

Public grid

Energy allocation

Pilot project: Prémian

Data flow
